TOP TEN SECURITY

6-Channel Programmable RF Remote Control HF Receiver

The 450R multi-channel receiver expands the capabilities of an existing High Frequency 1-Way security system by creating extra output channels or can be used anywhere as a stand alone unit. Each of the six outputs can be individually programmed for pulse/validity, latched, a latch resets with ignition or a 30/60/90 second timed output. The 450R is compatible with any Directed Electronics High Frequency 1-Way 4 button transmitter (434 MHz, 2⁶⁶ Codes) is required to use all of its outputs.

Ultrasonic Parking Sensor/Four Sensor Obstacle Detection System

Four flush mounted ultrasonic sensors integrate into vehicle's bumper. Sensors can be painted to match the bumper color. Interior Mounted Speaker provides Audible Obstacle Warning. 6 different warning sounds indicate distance and prevent backing into obstacles or property. Automatically activates when car shifts into reverse. No calibration required. Provides distance when parallel parking or backing into tight spaces. Works on any vehicle.
